

DECLARATION OF REACH COMPLIANCE

REACH Compliance Statement

The European Union's 1907/2006 Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) regulation addresses the production and use of chemical substances. Based on the June 2015 list for Substances of Very High Concern (SVHC), EndRun products are REACH Policy compliant.

Some EndRun Technologies products **do** and others **do not contain** substances on the Candidate List of Substances of Very High Concern (SVHC). This is specified by REGULATION (EC) No 1907/2006 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), which can be viewed here: echa.europa.eu.

In reference to the regulation and list of chemicals EndRun Technologies does not supply any of the listed substances in their homogeneous form. One or more of these substances may be present in the products End Run Technologies purchases. Copper alloy (brass) may be used to manufacture connectors. Copper alloy contains Lead, CAS 7439-92-1, formula Pb up to 4% by weight. Lead was added to the SVHC list June 2018. Therefore, dependant on the product purchased, End Run products may contain lead.

This declaration considers the most recent update to the REACH List of June 10th, 2022.
